## 募集要項

Position: Mechanical Design Engineer

Working day: Monday - Friday

Location: Prathum Thani

Responsibilities

- Develop and design customized machines and systems to create technologically sophisticated solutions for international customers.
- Responsible for projects in the field of mechanical design, covering the entire process from initial conception to the creation of manufacturing technical documents.
- Collaborate closely with sales, product management, purchasing, and production departments throughout the project

execution process.

- Provide technical support for manufacturing, assembly, and commissioning, answer related technical questions and oversee the implementation of your designed solutions.
- Provide support to customers and suppliers on project-specific topics.
- Ensure project costs, schedules, and quality requirements are under control at all times.

Qualifications

- Degree in Mechanical Engineering/ Mechatronics
- 3 years of experience in design and development of machinery/ industrial equipment
- Experience in 3D design and skills in AutoCAD and Autodesk Inventor
- Good English communication skills (spoken and written)
- Ability to work independently with limited supervision
- Organized, problem-oriented and hands on approach
