募集要項

Our client is a well-established Korean MNC in the manufacturing industry, currently expanding its operations in Malaysia with the development of a new manufacturing facility in Seremban.

They are now seeking an experienced Project Construction Manager (Korean Speaking) to oversee the entire Design & Build (D&B) project, from initial planning and construction through to commissioning and final handover.

Work Location: Kuala Lumpur (Initially), followed by Seremban, Negeri Sembilan

Job Responsibilities: -

- Lead and manage the end-to-end construction of a new manufacturing plant.
- Oversee Design & Build (D&B) activities, including civil, structural and MEP works
- Coordinate with architects, consultants, engineers and main contractors.

- Review construction drawings, technical specifications and project schedules
- Monitor project progress, budget, CAPEX and construction milestones.
- Manage contractor performance, tender evaluations, progress claims and variation orders (VO).
- Ensure compliance with safety, quality and local authority requirements.
- Liaise with relevant authorities for permits, approvals and CCC.
- Provide regular project updates and reports to local management and overseas HQ.
- Ensure timely project completion within approved budget and quality standards.

Job Requirements: -

- Degree in Civil Engineering, Construction Management, Architecture or related field.
- Min. 8–10 years of experience in construction or project management.
- Must have hands-on experience in Design & Build (D&B) of factories or industrial facilities from scratch.
- Proven experience in greenfield factory construction or new manufacturing plant setup.
- Strong knowledge of civil, structural and MEP works.
- Experience managing large-scale industrial construction projects, contractors and project budgets.
- Korean nationality or Korean language proficiency is highly preferred.
- Candidates with experience working for Korean construction companies or Korean manufacturing plants will have an added advantage.
- Experience coordinating with Korean HQ or Korean project stakeholders is preferred.
- Familiar with Malaysian construction regulations and local authority approvals.
- Willing to work in Kuala Lumpur initially before relocating to the Seremban project site.
