募集要項

Our client is a leading manufacturer of specialty electronic components, designing parts that perform unique, critical functions for innovative technologies. Through custom engineering and scalable manufacturing, they aim to enhance the performance of technologies with the power to change, improve, and save lives.

Job Responsibilities

- Responsible for developing, implementing, maintaining, and improving procedures consistent with certification of QMS, EMS and OSH Management Systems/ Standards.
- Work with the field and cross functional team for the investigation of customer complaint and provide the 8D report to our customer timely.
- Participate in FMEA (Failure Mode and Effects Analysis) activities to proactively identify potential quality risks and implement process improvements to enhance product quality and yield.

- Support internal audit to ensure internal process quality control system compliance and corrective/ preventive action effectiveness.
- Investigate and document non-conforming product occurrences, performing root cause analysis to prevent recurrence.

Job Requirements

- Min Degree in Engineering background
- Min 3-5 years of experience in Quality field
- Knowledge in RCA, CAPA, FMEA, 8D, and Continuous Improvements
- Capable of executing quality plans, test procedures, and inspection protocols for manufacturing processes
