Data centers are one of Japan's

fastest-growing sectors. If you've kept power plants, factories, airports or hospitals running, your skills transfer directly. US-headquartered commercial real estate and critical infrastructure services company (å¤–è³‡ç³» / ç±³ç³»). Osaka. Shift / day work. Permanent. Up to Â¥7M. ã€What you'll doã€‘ You'll oversee daily operations and maintenance at a data center where downtime is not an option: planned and reactive maintenance, fire, mechanical and electrical support, and environmental, health and safety compliance. As shift lead, you'll run the shift and day technicians and coordinate vendors and contractors on site. You'll issue and approve permits to work (high voltage, fire isolation, hot work), coach your team, run and document client meetings, and suggest technical and operational improvements. ã€Why joinã€‘ A stable, growing sector; specialist electrical, mechanical and safety skills; global teams and a chance to use English; a clear path towards Data Center Manager or Engineering Manager. ã€What you bringã€‘ - Facilities management experience in a data center or another critical environment (power plant, factory, airport, hospital, etc.) - Experience coordinating teams, vendors and operations where safety and continuity matter - Business-level Japanese (JLPT N2 or above) ã€Nice to haveã€‘ Knowledge of UPS, generators, CRAC units and cabling. ã€Applyã€‘ Apply via CareerCross or contact Drake International Japan.
