募集要項

Our client, MNC Gas Based Company, looking for suitable candidates

JOB RESPONSIBILITIES

- Prepare preliminary and detailed designs, specifications and documentation for all Piping and Mechanical engineering project work, ensuring compliance with conditions and parameters set out in project scope of works.
- Prepare schedules for design work, enabling projects to be completed on time and within budget. Preparation of feasibility studies and capital cost estimates. Assist with procurement, plant commissioning and optimisation where required.
- Monitor each project’s progress from initial to final stages, resolving technical design queries that arise and initiating remedial action where required .
- Liaise with Client representatives, engineers of all disciplines, project leaders and construction leaders as required to

ensure all project requirements are understood, communicated and implemented expediently.

- Provide guidance to discipline Drafters, management of vendors and sub-contractors.
- Conformance to all regulations, standards, codes and guidelines and best industry practice.
- Conformance to all engineering Quality and HS&E systems and procedures including those for design, procurement, construction and reporting.
- Effective management of HS&E to ensure safe operations which comply with relevant HS&E Legislation and Standards

JOB REQUIREMENTS

- Bachelor of Engineering level, in the Mechanical and/or Piping discipline
- Minimum 10 years industry experience, including Tier 1 Engineering Service Provider involvement in significant EPCm/EPC project delivery, and consultancy.
- Sound design and engineering and design/construction management involvement in metallurgical, refinery, hydrocarbons, chemical, manufacturing and minerals processing plants and associated infrastructure generally within the bulk and chemical/manufacturing/ mining / resources industries.
- Demonstrated design engineering, procurement, construction and commissioning experience.
- Primary Experience and knowledge of Tank/Surface Coating/Corrosion Protection, Static and Piping engineering/design development and fabrication
