## 募集要項

OVERVIEW

Our client, a leading Japanese engineering and infrastructure consulting company, is looking for a Construction Manager / Project Manager – Construction to support international railway and infrastructure projects.

This position will be responsible for providing construction supervision, technical reviews, and engineering support for large-scale transportation and public infrastructure projects across Asia and other international locations. The role focuses on ensuring construction activities comply with design intent, technical specifications, contract requirements, and quality standards from a consultant's perspective.

JOB RESPONSIBILITIES

- Review construction plans, shop drawings, and technical submissions for railway, transportation, and infrastructure projects.

- Monitor construction activities and assess compliance with design specifications, contract requirements, and engineering standards.
- Provide technical advice regarding construction quality, safety, durability, and risk mitigation.
- Respond to technical queries (TQs) and evaluate design changes or technical deviations submitted by contractors.
- Coordinate with clients, government authorities, railway operators, contractors, and project stakeholders.
- Participate in technical meetings, prepare progress reports, and support project communication activities.
- Support international infrastructure and railway projects funded by public sector organizations and development agencies.

JOB REQUIREMENTS

Mandatory RequirementS

- Bachelor's Degree or higher in Civil Engineering, Architecture, Construction Management, or a related discipline.
- Minimum 10 years of construction management, construction supervision, or site engineering experience.
- At least 1 year of experience in railway, MRT, metro, LRT, or transportation-related infrastructure projects.
- Strong technical knowledge to evaluate construction works from an engineering perspective.
- Professional working proficiency in English to communicate with clients, contractors, authorities, and multinational project teams.
- Willingness to undertake long-term overseas assignments and international business travel.

Preferred Qualifications

- Experience in railway, metro, MRT, LRT, road, bridge, tunnel, or public infrastructure projects.
- Knowledge of architectural design and multidisciplinary project coordination.
- Experience with projects funded by JICA, ADB, World Bank, or similar organizations.
- Background in engineering consultancy, EPC contractors, project management consultancy, or general contracting.
- Professional certifications such as Professional Engineer, Registered Architect, Chartered Engineer, or Construction Management certifications are advantageous.
- Japanese language capability would be beneficial for internal communication with Japan-based stakeholders and project teams.

BENEFITS

- Ssalary package commensurate with experience and project responsibilities.
- Overseas assignment allowance and international project exposure.
- Medical and social insurance coverage.
- Professional development, technical training, and language training support.
- Certification support and career development programs.
- Home leave entitlement during overseas assignments.
- Opportunity to work on large-scale international railway and transportation infrastructure projects within multicultural project environments.
