募集要項

As Platform Engineer, you'd work on an existing Platform Team to provide robust, reliable and cost-efficient Cloud Infrastructure services as the userbase continues to grow. The company has many English-speaking stakeholders, so you can collaborate with multinational team members without needing to speak Japanese.

What would you be doing?

- Architect and build AWS Infrastructure that is easily maintainable, robust, and scalable.
- Collaborate with Security Engineers to provision a secure Infrastructure.
- Create automations for AWS Deployments to ensure speedy delivery of Cloud Services.

Tech Stack Includes:

• AWS, Terraform, Github Actions, Prometheus, Grafana, Dynatrace, Atlantis, ArgoCD, OpenTelemetry.

What’s great about this opportunity?

- Hyrbid Remote Work + Full Flex-time, 1 day per week in-office.
- Career Growth Opportunity, building new in-house infra from scratch.
- Develop Large-Scale Product at growing company.
- Enjoy diverse, multilingual team environment, with the chance to learn Japanese OR English.

スキル・資格

What experience are we looking for?

- 5+ years professional experience building Cloud-based Infrastructure Platforms, espeically related to systems availability, performance and cost management.
- Good understanding of Cloud security best practices.
- Expertise in designing, building and troubleshooting large-scale streaming and distributed systems using Kafka.
- Familiarity with IAC tools in AWS such as Terraform, CloudFormation, CDK.
- Demonstrated skill in automation using languages like Python, ShellScripting, Go, Rust, etc.
- Business Level English OR Japanese for internal communication.
