募集要項

Ahead Consulting is seeking bilingual (Japanese/English Business or above) Network engineers to provide engineering and deployment support for a people center building relocation.

You will be working as part of the network tower and collaborating with other teams in order to build out and relocate users for international investment and retail bank in Tokyo.

Job Requirements:

- Experienced with Cisco switches, routers, and firewalls
- heavy vendor management skills needed

- project planning - WBG, facilitating stakeholder meetings, progress status reports, TO-DO action, etc.
 - data network design and configuration experience - e.g. Campus LAN networks (VLANS), inter-SW connectivity, Wi-Fi, and WAN connectivity to the DC
 - understanding voice technology and coordinating through voice vendors and technology teams on service delivery
-

会社説明

Ahead Group is a specialized technology consulting, managed services, and staffing organization providing services across the APAC region.

Ahead Group supports international clients with strategic positions in Tokyo, Hong Kong, and Singapore. As a long-term partner, Ahead Group provides flexible tailor-made technology solutions for every client. The specialists at Ahead Group have significant industry experience and deliver high quality, effective results.

Company History:

Ahead Consulting was founded in 2014 in Tokyo, Japan, to provide high quality IT services to the finance and insurance industries. Ahead Consulting has since expanded with offices in Hong Kong and Singapore to support regional clients.

Ahead Group Ltd. was established in 2017 as the regional holding company for all Ahead subsidiaries.

Ahead Staffing was established in 2017 as an affiliate of Ahead Consulting to address the need for permanent recruitment and dispatch hiring in Japan.
