募集要項

Essential Responsibilities:

The key responsibilities of the Lead Materials Planner may include the following as well as other items required to execute the role,

- Works with the region sales and operations to create the regional forecast (12-18 mo) and global forecasts
- Works with the sales and operations team to convert the demand plans into physical orders. Understands business trends, opportunities and how they impact the demand forecast.
- Assists in the execution and drives consistency of the S&OP process
- Analyzes incoming demand: identifies order exceptions, misalignment with product rationalization strategy and opportunities to utilize existing inventory

- Plans and schedules order timelines to be consistent with customer requirements while minimizing inventory and shipping costs
 - Works with the Product Line/Sales/Service Delivery to prioritize deliver dates as needed (push outs, pull ins)
 - Performs various material management analysis such as statistical material consumption and forecasts, aged inventory, aged PO, in-transit material analysis, safety stock, etc.
 - Implements inventory stocking strategies
 - Monitor levels of safety stock, global and aging inventory and works with regions and manufacturing plants to address accordingly
 - Works with the AMO organization to ensure spare parts and asset demands are captured
 - Works to ensure new assets, repaired assets and spares are captured with the Sales & Operations Planning process
 - Assists with product life cycle management for new and obsolete products to ensure they are incorporated into the S&OP process
 - Assists in driving product line make to stock (MTS), make to order (MTO), configure to order (CTO) and engineer to order (ETO) standards are implemented in the S&OP process
-

スキル・資格
