募集要項

- Client relationship management, trouble shooting and maintenance at the customer site.
- Support Japanese customers and report to German service department
- Telephone and onsite support for PINK solder system.
- Feedback to German service engineering and application team.

You can work for an exciting German company called PINK Japan with over 150 members of staff globally. PINK GmbH

Thermosysteme – founded by Friedrich Pink - run by his daughter Andrea Althaus for the last 10 years. The Japan office was established in 2015 and growing in size, several sales people and office management. You will be vital in making this company a success. PINK, a German hidden champion is a worldwide supplier for innovative and reliable customized systems and delivers products to well-known technology companies of e.g. automotive industry and their suppliers, semiconductor industry, electronics industry as well as chemical and pharmaceutical industry. Service Japanese customers and have the chance to travel around Japan including Kyushu to support any concerns. Provide feedback in English to German service engineering and application team.

There will be training in Japan as well as Germany. Have a mentor in Japan to learn the role in great detail. In terms of learning about PINK Japan and Germany as a country, you have this chance and all the while using your English skills. Feel at home in a family business and be part of a global company, get the best of both!

会社説明

The Plant Specialist - Global and forward-looking

PINK GmbH Thermosysteme – founded by Friedrich Pink - run by his daughter Andrea Althaus for the last 10 years – is located in Wertheim / Main and has more than 150 employees now. The product range includes systems for vacuum-supported soldering, sintering systems, low-pressure plasma systems for surface treatment as well as systems for drying and processing technology.

In the past years, the family business PINK has grown steadily and successfully due to continuous product improvements and consequent customer orientation.

PINK operates internationally with a network of sectoral agencies in all major markets and is a worldwide supplier of customized plants and systems.

Well-known technology companies of e.g. automotive industry and their suppliers, semiconductor industry, electronics industry as well as chemical and pharmaceutical industry rely on the qualitative and innovative products of the company.
