募集要項

Description

Responsible for full life-cycle of projects from initiation to completion. Apply IT project management methodology and appropriate project management framework for all projects. Successfully initiate, plan, execute and close all project deliverables as committed.

Responsibilities

Responsible for managing the overall planning, execution and delivery of projects including:

- Defining the project charter, roles, tasks, milestones, budgets and measures of success.
- Developing project estimates and plans to manage the end-to end project execution.
- Ensuring client requirements are captured accurately and completely.
- Creating and maintaining project documentation.
- Facilitating day-to-day coordination while adhering to standards and sponsor expectations.

- Acting as the link between the assigned project resources and key stakeholders.
-

スキル・資格

Successful consultants will have:

- 5-8 years of Project Management experience in a large multi business unit organization required.
 - Experience implementing large-scale business systems.
 - Experience overseeing large scale projects, global teams, project managers and application leads.
 - Project Management Accreditation (APMP, PMI, Prince 2 or equivalent preferred).
 - Advanced project management skills. Knowledge of project management vocabulary and terminology. Mastery of project domain.
 - Excellent facilitation and presentation skills. Cultural adaptability. Virtual and remote team management ability. Independent and innovative spirit. Flexible and responsive to input.
-

会社説明
