募集要項

Job Description

Successful candidates should have technical expertise in network technologies.

Although operational support is not a normal part of the role and that other network staff provide support for escalation of network incidents, it is expected that, within reason the candidate will serve as a senior escalation point for Critical impacting network incidents.

The domain focus for this position will be the development of the client's network engineering strategy and standards, defining network technology roadmaps, and creating new methodology/tools for maintaining alignment to business, security policies, and priorities.

スキル・資格

Required skills

Successful candidates will have demonstrated knowledge of network technologies and commitment to life-long learning through achievement of professional qualifications.

- Must have Cisco "Routing and Switching" certifications, CCNP or above required.
- Understanding of networking protocols: BGP, OSPF, EIGRP, NAT, IPSEC/GRE, VPN, Multicast/Unicast, VLAN, STP, HSRPNVRRP, and load balancing
- Knowledge of TCP/IP protocols including IP, TCP, UDP, FTP, DNS, ARP, and DHCP
- Experience designing, developing, configuring, and implementing large scale global enterprise networks with diverse solutions from multiple vendors
- Experience with SDN (Software Defined Networking), WAN (Wide Area Networks), and LAN (Local Area Networks) network technologies preferred.
- Experience with NAC (Network Access Control) systems such as Cisco ISE or equivalent.
- Familiarity in video, voice, and wireless network technologies.
- Familiarity with storage and server virtualization technologies and dependencies to network infrastructure.
- Fluent level Japanese required

会社説明

Ahead Group is a specialized technology consulting, managed services, and staffing organization providing services across the APAC region.

Ahead Group supports international clients with strategic positions in Tokyo, Hong Kong, and Singapore. As a long-term partner, Ahead Group provides flexible tailor-made technology solutions for every client. The specialists at Ahead Group have significant industry experience and deliver high quality, effective results.

Company History:

Ahead Consulting was founded in 2014 in Tokyo, Japan, to provide high quality IT services to the finance and insurance industries. Ahead Consulting has since expanded with offices in Hong Kong and Singapore to support regional clients.

Ahead Group Ltd. was established in 2017 as the regional holding company for all Ahead subsidiaries.

Ahead Staffing was established in 2017 as an affiliate of Ahead Consulting to address the need for permanent recruitment and dispatch hiring in Japan.
