### 募集要項

Technical Consultant is a specialty job for those who have studied science and engineering. The project is organized with the client, and the project is carried out in order to confirm whether the energy such as steam, hot water, water, electricity, etc. is used efficiently in the field. The tasks will require to analyse the optimization and plan improvements, then conduct the adaptation design on the actual plant, from the introduction and trial operation to confirm the effect in order to achieve the result. Main task will be consulting services to identify problems, collect and analyze data, solve problems, develop new technologies, and plan product development based on the customer's issues.

※You can learn the job well through on-the-job training, so you can work even if you don't have much experience.

※Department: About 10 people (We have a Singaporean consultant, and two assistants (American and Mexican))

#### **【Characteristics】**

■Based on our development policy of "Produce only patented products", we have acquired more than 3,900 patents, and improve the thermal efficiency of plants and extend the life of products.

■As a new business aimed at further growth, we have developed the condition monitoring system for diagnosing and monitoring plant conditions on the Internet 24 hours a day, 365 days a year.

■Acquired ISO and ASME certifications for high quality (Our Company is the only company in Japan that has obtained certification in the same industry.)

#### **【Company style】**

■As the world's leading steam specialist in the industrial sector, our company is growing in pursuit of customer satisfaction.

■You can get favorable treatment commensurate with your results and performance even if you are young, if your abilities are recognised.

■We place great importance on the lives of our employees by not forcing them to transfer to different locations without their wishes.

#### **【Working time】**

08:30 ~ 17:30 (Includes 1 hour break)

#### **【Salary】**

Fixed annual salary : 3.9M~4.5M yen ※Depends on your experience

#### **【Welfare・Benefits】**

- ・Visa support
- ・Social insurance (Health Insurance, Pension, Employment Insurance, Long-term Care Insurance)
- ・Annual allowance for returning home (200,000 yen)

---

#### スキル・資格

- ・English native level
- ・No Japanese is required
- ・University major in engineering or science (Mechanical engineering, physics, chemistry, energy (Nuclear power, heat, etc.)).
- ・Study abroad experience in Japan or working experience in Japan
- ・Someone who is interested in the energy industry

---
