募集要項

Paidy is looking for full and back-end engineers to join the platform team. We build and support an innovative payment platform that processes cardless payments, opening up convenient online commerce for people without credit cards. Every day, week & month, our challenge is to scale and support the growing merchant and consumer base, evolve along their

needs, while maintaining and protecting simplicity along all dimensions.

=====

Job Description Details: will be working as a team, and the levels of responsibilities may vary.
But the basic Job details are...

- Create elegant and useful solutions to solve complex business problems by working across various teams, understanding the needs of our customers, and putting on your product manager hat to provide solutions to solve those problems.
- Work closely with product management and customer experience teams to define and refine feature specifications.
- Analyze and improve the efficiency, scalability, stability, and security of business applications to help scale the company.
- Ability to evaluate new and existing technologies and make recommendations for application improvements
- Work on small teams to create new features that delight our customers.
- Write efficient, maintainable code.
- Build systems that process, understand, and transform large volumes of data into a variety of purposes
- Build API's for web and mobile clients
- Build connection interfaces for third-party systems
- Engage in the full development lifecycle including architectural design and testing
- Be a force-multiplier on the velocity and quality of your team

=====

Structure of the Organization:

In Engineering Division, we have 6 teams (Payment/Risk&Data/Support Service/Financial Product/Production Engineering/Technical Operation&QA).

And the open position-'platform team' belongs to "Payment Team" and we have 12 members.

Roles of the Division:

To build and support an innovative payment platform that processes cardless payments, opening up convenient online commerce for people without credit cards.

=====

Paigy Culture:

-**Diversity**-accepts everyone's values

-Members come from over **30 contries**

-**Mature, respectful, professional and team worker**

-Bring out our best performance under the flexible working environment (**81% wearing jeans, 11% working past 7pm etc...**)

スキル・資格

- Coding experience in Scala or 5+ years experience in Java.
- 2-3 years of software engineering work experience.
- Experience with at-least one SQL or NoSQL database.
- Experience and/or desire to use Functional Programming.
- Strong CS fundamentals in object-oriented design, data structures, algorithm design and complexity analysis.
- Understanding of application architecture and object-oriented design.
- Experience building complex software systems that have been successfully delivered to customers.
- Mastery in professional software engineering practices for the full software development life cycle, including coding standards, code reviews, source control management, build processes, testing, and operations.
- Ability to handle multiple competing priorities in a fast-paced environment.
- Experience building enterprise software a plus.

会社説明

Paidy Inc.'s service "Paidy" covers over 100 million Japanese consumers for real-time online payments. Without any pre-registration and credit card, we provide fast, safe and convenient payment to consumers.

We believe that a superior online payment experience that gives consumers peace of mind and is easy to use can significantly increase conversion and sales. That is why we are focused on converting visitors into buyers, with Paidy.

Creating new financial service in Japan

By combining BigData Streaming and Machine Learning with years of successful risk analysis experience, Paidy has developed the largest cardless, real-time payment network in Japan. Paidy aggregates the most popular non-credit card payments into a single, real-time, 100% guaranteed payment network available to all qualifying consumers.

Our developer-friendly API and Paidy Check-Out let our merchant partners focus on building great online shopping experiences, without the complex management of multiple payment methods and providers.
